HUMPBACK WHALES

Each year, humpback whales (*Megaptera novaeangliae*) undertake one of the longest migrations of any mammal—traveling up to 10,000 kilometers from the cold, nutrient-rich waters of Antarctica to the warm, sheltered lagoons of the South Pacific. Between July and October, these tropical waters become vital breeding and calving grounds. Here, in the calm blue, mothers give birth to calves and males compete for mates through acrobatic displays and haunting underwater songs. Humpbacks are known for their dramatic breaches, where they launch their massive bodies—up to 16 meters long and weighing 30 to 40 tons—out of the water in a powerful arc. These behaviors, along with tail slaps and fin waves, are believed to serve as communication, courtship, and even playful interaction. Beneath the surface, male humpbacks sing complex, evolving songs that can last for hours and travel great distances. Each population has its own unique song, and these vocalizations may help attract females or establish dominance among males. Newborn calves, measuring around 4 meters and weighing nearly a ton, nurse on their mother's rich milk and stay close for protection. The bond between mother and calf is strong, with mothers often seen gently guiding their young to the surface to breathe. These early months are critical, as calves must gain enough

strength and blubber to survive the long journey back to Antarctic feeding grounds. For many South Pacific islanders, humpbacks hold deep cultural and spiritual significance. Whale-watching tourism has grown in recent years, offering visitors the chance to observe or even swim alongside these majestic animals under strict conservation guidelines. These encounters foster a powerful connection to the ocean and support local economies while promoting marine conservation. Despite protections under international agreements like the International Whaling Commission's moratorium on commercial whaling, humpbacks still face threats. Climate change is altering ocean temperatures and currents, which can affect migration patterns and food availability. Entanglement in fishing gear and ship strikes also pose serious risks. Conservation efforts in the South Pacific, including marine protected areas and scientific research using satellite tagging and acoustic monitoring, are essential to understanding and protecting these whales.

ELEMIS FRANGIPANI

EXPERIENCE THE EXOTIC

► THE ZÀGARA BEAUTY SPA, DECK 7

Conditioning Hair and Scalp Ritual Style Dry.

This tantalizing ritual includes massaging our precious Monoi Oil into your hair and scalp to ease away stress and leave hair super shiny.

HUBERT: TANZANITE BLUE AND VIOLET

THE ONBOARD BOUTIQUE

► 10:30, THE BOUTIQUE, DECK 5

Tanzanite is an extraordinary gemstone, its appearance is influenced greatly by its ability to show hue's of blue and violet when viewed from different directions. The gemstone was discovered near the city of Arusha and Mount Kilimanjaro.

Join Isabel, gem and jewelry consultant for Hubert jewelry as she presents our beautiful collection of fine Tanzanite jewelry and find out more with insights and facts about this special gem. Shipboard credit may be applied.

All of Hubert's designs are Tax and Duty-Free and Exempt from US customs charges Ask in-store for details.
