WHAT IS FLOTSAM & JETSAM?

You may have heard of 'flotsam and jetsam' but do you know the meaning of the words? While the phrase 'flotsam and jetsam' is often used to describe 'odds and ends,' each word has a specific meaning under maritime law.

In maritime law, flotsam, jetsam, lagan and derelict have specific nautical meanings, with legal consequences in the law of admiralty and marine salvage: Flotsam is floating wreckage of a ship or its cargo. Jetsam is part of a ship, its equipment, or its cargo that is purposely cast overboard or jettisoned to lighten the load in time of distress and is washed ashore. Lagan (also called ligan) is goods or wreckage that is lying on the bottom of the ocean, sometimes marked by a buoy, which can be reclaimed. Derelict is cargo that is also on the bottom of the ocean, but which no one has any hope of reclaiming (in other maritime contexts, derelict may also refer to a drifting abandoned ship).

Flotsam may be claimed by the original owner, whereas jetsam may be claimed

as property of whoever discovers it. If the jetsam is valuable, the discoverer may collect proceeds received through the sale of the salvaged objects.

A majority of the trash and debris that covers our beaches and floats in our ocean comes from storm drains and sewers, as well as from shoreline and recreational activities such as picnicking and beach going. Abandoned or discarded fishing gear is also a major problem because this trash can entangle, injure, maim, and drown marine wildlife and damage property.

Today, all four categories of debris— flotsam, jetsam, lagan, and derelict—are generally grouped together in most countries' maritime laws. However, according to the United Kingdom's Merchant Shipping Act of 1995, flotsam, jetsam, and lagan remain the property of their original owners when discovered by rescuers or salvage agents, but derelict falls under an entirely different and comprehensive set of regulations.
